

Andrew woke up with a guinea worm coming out of his foot as a result of drinking unsafe water a year previously. Anjali awoke with a cough because smoke from kilns filled her dilapidated home. Tyler stayed home from school because he had a stomachache from eating bad beef. What are the links between the environments in which these young people live and their health problems? The stories, most set in poor communities, draw attention to the effects of air, water, food, climate, urbanization, and other human impacts on health. A comprehensive teaching guide provides a context from which readers can explore problems and solutions in environmental health.

ABOUT THE CONTRIBUTORS Emily Mendenhall is a medical anthropologist and founding director of Global Health Narratives for Change (www.ghn4c.org).
