

The present volume differs considerably from its first edition and the many changes made provide a new structure and presentation of the information. Separate new chapters each describing the tumours of the major parts of the alimentary tract have been added. New chapters are included on tumours of nasal cavity and the gallbladder. New findings have been incorporated whenever possible and relevant, so as to ensure that this series, of which this is the third and last volume, reflects the latest developments in this area of research. Pathology of Tumours in Laboratory Animals

War at the Top of the World: The Struggle for Afghanistan, Kashmir and Tibet, Germania, Metaphor in Focus: Philosophical Perspectives on Metaphor Use, The Misanthrope, New International Version - Bible on Cassette (Old Testament: Psalm 122--Malachi (voice only)), Physical Aspects of Protein Interactions 1978: Conference Proceedings (Developments in biochemistry), Touchstone Level 2 Workbook B, Blutenschimmer 2017, Condemned as a nihilist: a story of escape from Siberia, Stusy Projects in Physical Chemistry,

Pathology of Tumours in Laboratory Animals, 2nd Edition, Volume 3: Tumours of the Hamster. IARC Scientific Publication No. Edited by Turusov VS, Mohr.
